FLEXIBILITY + VALUE

NEW METHODS PROVIDE FLEXIBILITY TO CREATE CUSTOM SHAPES AND SIZES AND GREAT VALUE SAVINGS IN PRODUCTION COSTS AND REPLACEMENT GRAPHICS

DIMENSIONAL SIGNAGE

With our diverse inventory and in-house print, paint and routing capabilities, Parallax can create dimensional lettering and multi-layered graphics using a variety of materials and finishes. Numerous installation options provide a custom look to compliment your architectural design.

- Stainless Steel
- Brass
- Copper
- Textured Metal Overlays
- High Density Urethane
- Fabricated Aluminum
- UltraBoard with Veneers
- Non Glare Acrylics with printed Overlay

MONUMENT AND DIRECTIONAL SIGNAGE

Parallax comprehensive services include design, fabrication and installation of directional sign systems. Sign systems include building identification, monument signs and traffic control. Flexible cost effective sign systems are available for directory signage with changeable panels for updating tenants. Sign systems are available in illuminated and non-illuminated options.

Parallax utilizes the best, quality tested materials to construct eye-catching, economical solutions. Monuments constructed of aluminum with routed high density urethane sign panels, hard coated EPS foam with acrylic coating and available in stone or brick veneer can provide years of durability and minimal maintenance. Parallax can create a sign system that will compliment your architectural design.

ADA SIGNAGE

Complete ADA sign packages are available with raised tactile copy and braille for room identification and way-finding directionals. Signage packages can be custom built in combinations of acrylic, wood veneers, second surface graphics and encapsulated acrylics. In addition, brushed stainless or polished metal accents can create a "One of a Kind" system for your facility.
